Sequence

Learn how to save and play back camera shots to create simple animations.

Edit Sequence

Find and save the shots and angles you want. Save and arrange shots in a sequence. This can also be useful for saving specific scenes.

Tap Sequence in System Menu

Tap Sequence in the system menu at the top right of the screen. When using Sequence, other interfaces will be hidden. Tap Back at the top right of the screen to return. Even if you close the sequence, the saved shots will remain.

Add Shot

Tap the + icon in the Sequence tab to add a shot. The shot will capture the current view and angle. Tapping an added shot will instantly switch to that view. Shots are always added in the next order relative to the active shot.

Tap and Hold to Select

Tap and hold on a shot with your finger or pen to select it. You can select multiple shots by tapping another shot while one is already selected. Tap a selected shot again to deselect it.

Change Sequence Order

With a sequence selected, tap the directional icons on either side to change the sequence order.

Delete Shot

Select a shot and tap the trash can icon on the right of the sequence to delete it. Note that deleted shots cannot be recovered.

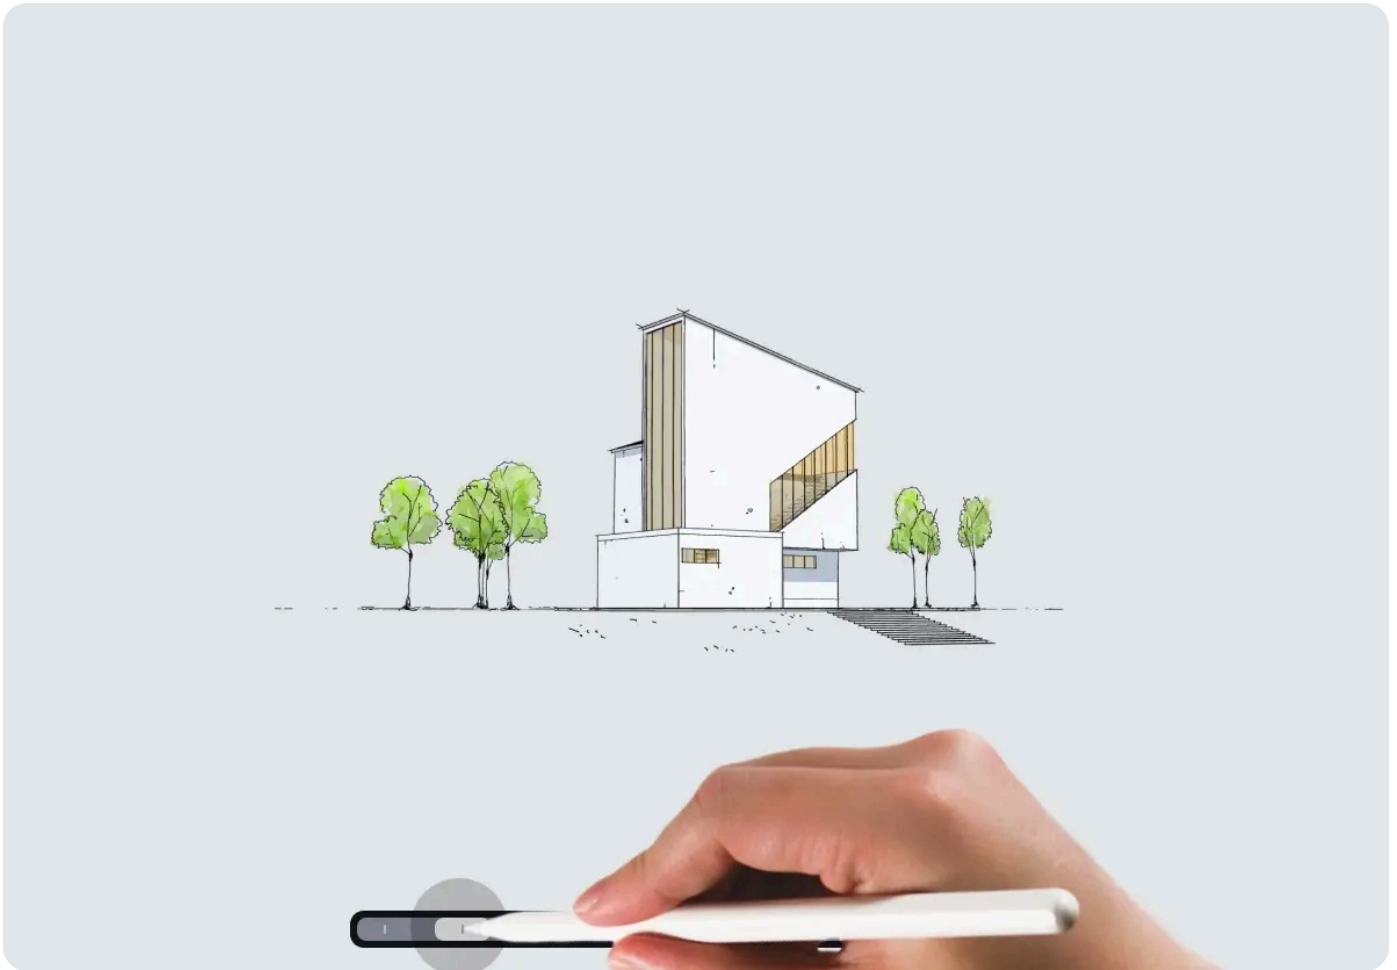

Play Sequence

Play back and view your shots. Create presentations to show others or make simple animations.

Play and Pause

After adding one or more shots, tap Play in the sequence to switch to playback controls. Press the play button in the center of the screen to play the sequence. Press it again to pause. Tap the arrows on either side of the play button to switch between shots.

Tap and Slide Timeline

Tap and slide the timeline at the bottom of the sequence to manually move through the timeline.

Change Playback Speed

Tap the number on the left of the sequence to change the playback speed. You can play at 0.5x, 1x, or 2x speed.

Change Playback Modes

Tap the number on the right of the sequence to change the playback mode. You can switch between play once, loop, and swing modes.

Options

Use these options for more precise and detailed sequence settings.

Tap Sequence Options

Tap the Sequence Options on the right of the sequence to toggle various options.

UI Always On

Tap 'UI Always On' to keep the sequence interface visible even during playback.

Thirds Grid

Tap 'Thirds Grid' to overlay a 3x3 grid on your camera. This is especially useful for composing your shot.

Camera Info

Tap 'Camera Info' to check the current location, rotation, and lens field of view of the camera. The location and rotation are displayed in X, Y, and Z axes, representing the current distance and angles.
