

Documentation > Transform > Interface

Interface

Explore the basic layout and learn how to use Transform.

Layout

The UI related to Transform only appears when you tap the Select tool or select a group or resource from the Stage Panel.

2D Joystick

1. Move

Move the selected curve or resource freely.

2. Rotate

Rotate the selected curve or resource.

3. Free Scale

Freely scale the selected curve or resource.

4. Width Scale

Scale the selected curve or resource horizontally.

5. Height Scale

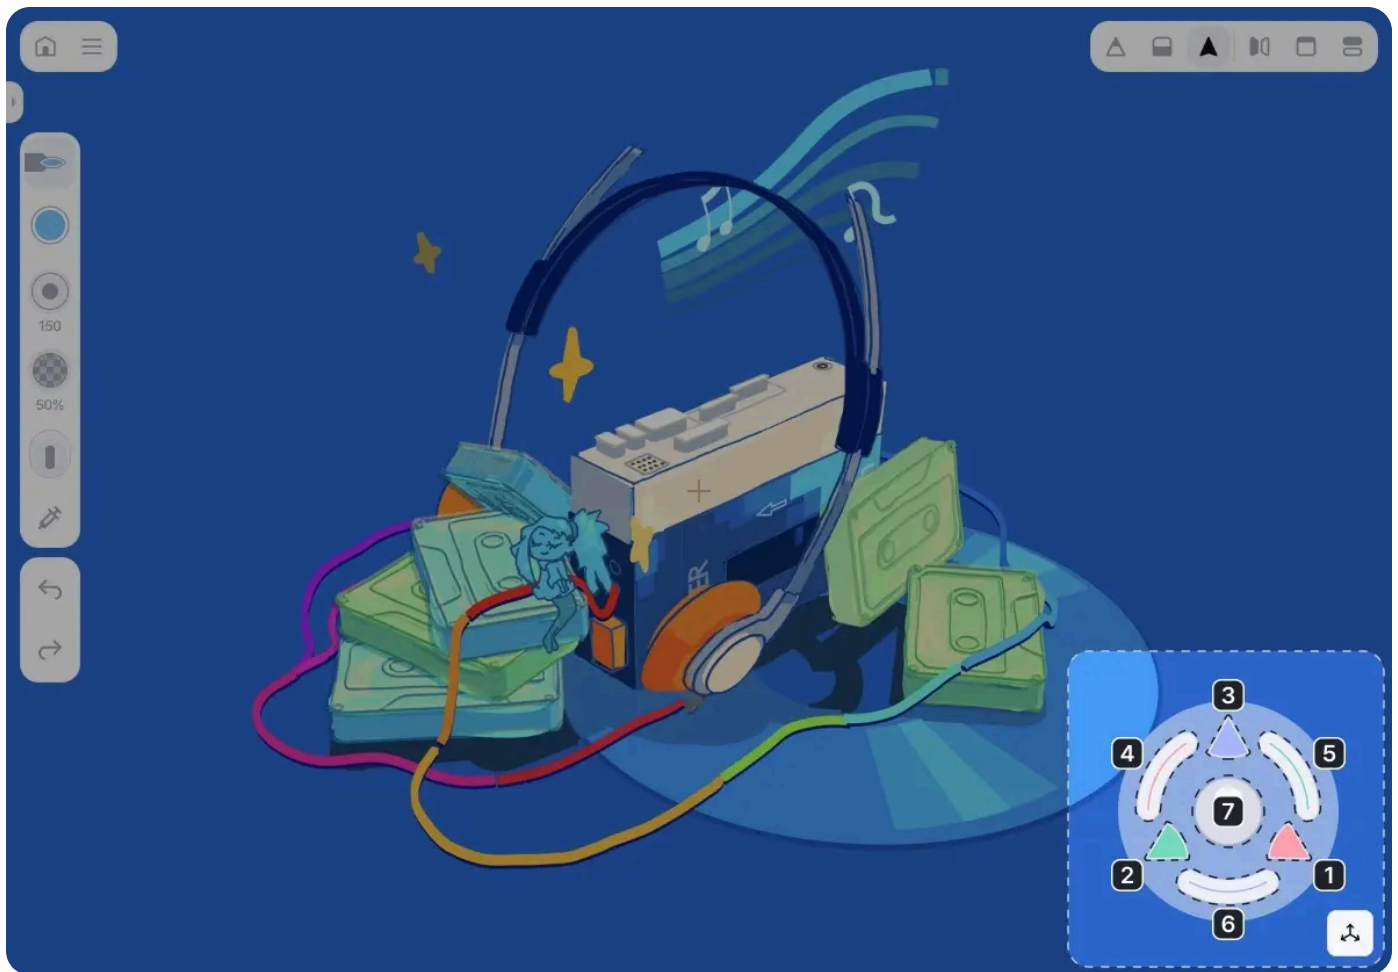

Scale the selected curve or resource vertically.

6. Lock 2D Joystick

Lock the 2D Joystick. When locked, you can only transform in restricted directions or values. Learn more about [Lock 2D Joystick](#).

7. Switch to 3D Joystick

Switch to the 3D Joystick.

3D Joystick

1. Move to X Axis

Move the selected curve or resource along the global X axis.

2. Move to Y Axis

Move the selected curve or resource along the global Y axis.

3. Move to Z Axis

Move the selected curve or resource along the global Z axis.

4. Rotate by X Axis

Rotate the selected curve or resource along the local X axis.

5. Rotate by Y Axis

Rotate the selected curve or resource along the local Y axis.

6. Rotate by Z Axis

Rotate the selected curve or resource along the local Z axis.

7. Free Rotate

Freely rotate around the center point of the curve or resource like a trackball.
